Please feel free to download the **registration form** at www.lrmfa.org.

FST&EMS Briefing Times &

Dates!! Mark your calendars! Ever wonder what is going on in the Division? Have something you'd like to say, or questions you'd like to ask? Then, please attend the next Division of Fire Standards and Training & EMS briefing on **October 20, 2008** at 9 AM!! The following briefing will be on **November 3, 2008**.

Fun Times Create Great

Ideas!! The Fall Festival sprouted a fantastic idea that we need your help with! Because of all the delicious dishes we shared together, the idea of compiling and sharing the recipes in cookbook form was brought up. We frequently have

bake sales and "pot luck" lunches throughout the year as staff and those times are all the more fun because of the delicious food we all share. Everyone enjoys the different dishes and desserts from other staff members. Wouldn't it be great to have a handy cookbook with all those recipes stored in it that you could share throughout the year at ALL of the events that you attend? Karen Louis would like you to send her your favorite recipes via email! She'll work on organizing them into a cookbook containing all the fantastic recipes you've enjoyed with your colleagues!! Look for the "cookbook logo" in upcoming Rap Sheets so you can read updates on this fast, easy and fun idea!!

FREE King size WATER

Bed!!! Complete with wooden bed frame, six-drawer pedestal, mattress (6 years old), 2 heaters, mattress pad and one set of sheets. Please see Rick Mason for details.

Josh Calley, "The Intern".

The New Hampshire Division of Fire Standards and Training & EMS has recently been graced with the presence of an intern.

Josh Calley, a junior in high school, comes to us from Second Start on North State Street here in Concord. This is Josh's second week helping out with duties at the Academy. He is here Tuesday through Friday from **8:30-11:30**. Josh is receiving school credit for his internship. He has kept busy under direction from Cpt. Andy Anderson, and Cpt. Lenny Deane. He has worked on organizing some shelving, setting up a scheduling board, and assisting with and cleaning equipment in the Fire House with the O-51's. He also has been shadowing and observing various classes here at the Academy. He saw some of the C2F2 class in action last week, shadowed at the ARFF site, and is going to be donning some turnout gear on his own in the coming months! Josh is anticipating some time in our training facilities, getting used to the gear, and even using an SCBA mask. His stay will be brief, we only anticipate his internship to last through December, but, we can only hope that being surrounded with this learning environment will make his future career path that much clearer.

Ropes Rescue Operations- Tied up Tidy!

This week we are highlighting the Ropes Rescue Ops class that we offer. Steven McKenna is the Program Coordinator on this class and informed me that the class ran smoothly, his exact words were, "No one fell!". The

students have had this class all week starting on Monday. They are scheduled to have their exam today, Friday, in the mid to late afternoon.

Director Mason would like to inform/remind us all that drinks ARE allowed in Classroom 3. Coffee, soda, water, etc. is allowed to be consumed while in that classroom.
